He questioned the developers if they have solar in their back yard. He stated that he talked to other people involved with solar and stated that if the government was not subsidizing them, they would not be built.
4. Diane Ferguson talked about her first meeting she attended and after searching the internet Sanilac County was the highest cancer area in the US and now it is St. Clair County. She talked about how much the County will get a big portion of the tax revenue created by solar.
